DETAILED ACTION

1. This office action is in response to Applicants' amendment of 7/26/04.

Election/Restriction

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
- I. Claims 2, 9-15, drawn to integrated circuitry testing and simulation, classified in class 714, subclass 741.
 - II. Claims 3-8, 16-18, drawn to memory testing, classified in class 714, subclass 718.
 - III. Claims 19-22, drawn to circuitry for memory testing, classified in class 714, subclass 724.

- 2.1 The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, all inventions I-III have separate respective utility such as use in testing, simulation & testing of integrated circuitry, and circuitry for testing of integrated circuitry. See MPEP § 806.05(d).

- 2.2 Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

- 2.3 Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
